

WSC 16

Online Conference on Soft Computing in Industrial Applications

December 5-16th, 2011

[Home](#) » [Forums](#) » [Conference close](#)

Best paper and ASC fast track papers

Authors:

Humberto Bustince (Programme chair)

Abstract:

BEST PAPER AWARD

After considering not only the papers and reviews but also the online presentations and interaction of the author(s), the best paper award goes to:

Radu-Emil Precup, Radu-Codrut David, Emil Petriu and Stefan Preitl.

[Optimal Fuzzy Controllers Tuned by Charged System Search Algorithms](#)

Congratulations!!

We would like to add that it has been a difficult decision due to the high quality of many of the contributions.

ASC FAST TRACK PAPERS

As in previous WSCs we have been able to select a number of papers for a fast-track submission to the Applied Soft Computing journal.

After a careful review of all the papers presented to the conference, it has been decided to propose the following papers for this fast-track

subission.

Optimal Fuzzy Controllers Tuned by Charged System Search Algorithms

Intelligent Bayesian Network-Based Approaches for Web Proxy Caching

Hinging hyperplane based Regression tree identified by Fuzzy Clustering

Optimizing Quantitative and Qualitative Objectives by User-System Cooperative Evolutionary Computation for Image Processing Filter Design

Hybrid Intelligent Automatic Image Annotation Using Machine Learning

A Novel Dynamic TOPSIS-based Particle Swarm Optimization Algorithm for Resource Constrained Project Scheduling Problem

Reliability Analysis of Press Unit in a Paper Plant using Weibull fuzzy distribution function

Improving minority class prediction using cost-sensitive ensembles

Congratulations! The successful authors will be contacted with more information in the new year.
